\*The angle from the center of the screen to have 50% of the initial luminance.

##### Uniform Brightness

LG's LED backlight technology guarantees high uniformity in brightness to ensure a clear picture. On other screens, certain spots may appear darker than others, but the new VH7B generates high visibility and a consistent brightness across the whole screen.

##### Image Gap Reduction

The VH7B includes an image improvement algorithm that can adjust to objects located in the boundary of bezel for a seamless viewing experience.

##### Shine Out

The VH7B is the perfect fit for window displays because it reflects sunlight for better visibility and a clearer image than conventional panels.

#### Enhanced Content Management

##### LAN Daisy Chain Performance

A LAN daisy chain allows you to execute commands to control and monitor the screens and even update their firmware.
